## ULVAC Components News

### List Price Revision of Compact type partial pressure monitor MALIN's sensor head

We ended the sales of "small partial pressure"『MALIN』 in 2008. But we are now also continuously selling the sensor head which is consumable parts. Elapsed 7 years from the sales end and the production volume decrease. For that there is no way anymore to sustain the same price by our management effort. To keep a stable supply of this consumable parts we need to ask for the price increase. We thank you for your understanding.

We appreciate your business and look forward to serving you in the future.
