The ULVAC Group aims to contribute to the development of industries and science by comprehensively utilizing its vacuum and peripheral technologies through the mutual cooperation and collaboration of the Group companies.

Management
Policies

Improve Customer Satisfaction
Innovations in Production Technology
Development of Original Products
Free and Open-minded Organization
Enhancing Corporate Value

ULVAC's goal for 2050 is to become "a company that utilizes vacuum technology to create value for the world with its partners and continues to contribute to the future of people and the planet."

'ULVAC' is a combination of 'UL' from 'ultimate' and 'VAC' from 'vacuum,' signifying that we pursue the 'Ultimate in Vacuum Technology.' In 1952, ULVAC was founded by a group of young people who aspired to contribute to Japan's post-war reconstruction and the development of industry and science through the use of vacuum technology. This aspiration led to the creation of various types of vacuum technology equipment that played important roles in multiple fields ranging from automobiles and electrical appliances in everyday life to raw materials and chemicals in industry. For the most advanced industries, such as flat panel displays, semiconductors and electronics, vacuum technology has become indispensable, and we have grown by responding to changes in the prevailing way of life. Our mission is to continue to create value for the world and contribute to the future of people and the Earth through vacuum technology.

In an era of change, we are never satisfied with the status quo but always embrace change, pursuing cutting-edge vacuum technology together with our partners. We will contribute to the realization of a sustainable society through vacuum technology, ceaselessly striving to fulfill our social responsibilities.
