ULVAC Group's Value Creation Flow

Contributing to the progress of society by tackling social issues through the provision of products and technology

Since ULVAC was established, we have dauntlessly challenged ourselves to create new value that is demanded by the times, seeking out the infinite possibilities of vacuums, and refining technology that freely manipulates vacuums.

We provide products and technologies that contribute to the solution of social issues through our three strengths of "research and development," "global networking," and "customer support," in order to respond to the needs of customers and the market. Furthermore, we will contribute to the progress of society through sustainable expansion and continual improvement in corporate value in order to be an institution that is valued by society.
